

STERLING

A new 135' motoryacht project designed specifically for the American market was unveiled during the recent Miami Boat Show by Sterling Yacht Company Chairman Sam Amao. The new 135' Sterling composite project features exterior styling and arrangement by Ft. Lauderdale based Hargrave Yacht Design. The Hargrave Organization is also the sales and service representative for this large Japanese yacht builder.

Chairman Sam Amao and associate Yoshirio Uchiyama attended the new 135' presentation at the Hargrave display which received a positive response from potential customers and brokers alike. Two 135' contracts are under final negotiation at press time in association with a major Ft. Lauderdale brokerage organization.

Michael Joyce, President of Hargrave, described the 56 page preliminary specifications as "High End European" and said the yacht will stand up to the scrutiny of the most demanding clients. The yacht is fully classed to ABS and MCA and being offered at under \$15.0 million USD in a fixed price contract. "With our unique 100% financing program payable at the end, and a contract fixed in US dollars it becomes an outstanding value when you factor in the savings from costs of funds normally associated with projects of this size," said Mr. Joyce.
